Forecast for Saturday 26 Mar 2022

Weather: Dry and mainly clear overnight. A few shallow mist and fog patches possible in the valleys around dawn, soon clearing. Otherwise dry and mainly sunny during daylight hours, perhaps a little fair weather cloud in the afternoon. Feeling warm by afternoon, although a chilly start with a touch of frost possible.

Chance of cloud-free hill tops above 800m: 95%

Low cloud and visibility: No significant cloud expected. Visibility good or very good with some hazy conditions at times, except in any early mist and fog.

Mountain Weather Forecast

Ground Conditions Supplement

Date: Friday 25 March 2022 Location: Helvellyn summit at 10:22 Full report: Similar conditions to the preceding week remain in place with high pressure dominating and a fair forecast for the weekend with plenty of sunshine and relatively light winds. Suncream and plenty of fluids are recommended for anyone heading out into the fells in the next few days. Ground conditions remain largely dry and the fells and paths are almost entirely snow-free with the exception of a few small patches which can be found dotted around north and east-facing corrie rims above roughly 900m. Striding and Swirral Edge are in great condition at the moment with dry and grippy rock and these routes are also snow-free with just a couple of small patches on their final slopes which are easy to avoid. Despite the current settled and spring-like conditions, it's important to remember we could still get significant snowfall on the fells through to Easter and beyond. Please continue to check the weather forecasts and go prepared with the correct warm and waterproof clothing and a map and compass for navigation. Temperature: plus 14.0 C, Maximum wind speed 3.5 mph, Wind chill: plus 14.0 C, Average wind speed: 2.1 mph
